

# Bird-Snack

A composite image featuring a bird, possibly a starling, with its beak open and pecking at a glowing, multi-colored supernova remnant. The bird's feathers are rendered in a vibrant, almost iridescent style with shades of blue, green, and yellow. The supernova remnant is a complex, textured sphere of light with a color palette dominated by reds, oranges, and yellows. The background is a deep black space filled with numerous small, distant stars.
